

Paw Tracker

Dog Sport Tracker App

Sprint 5

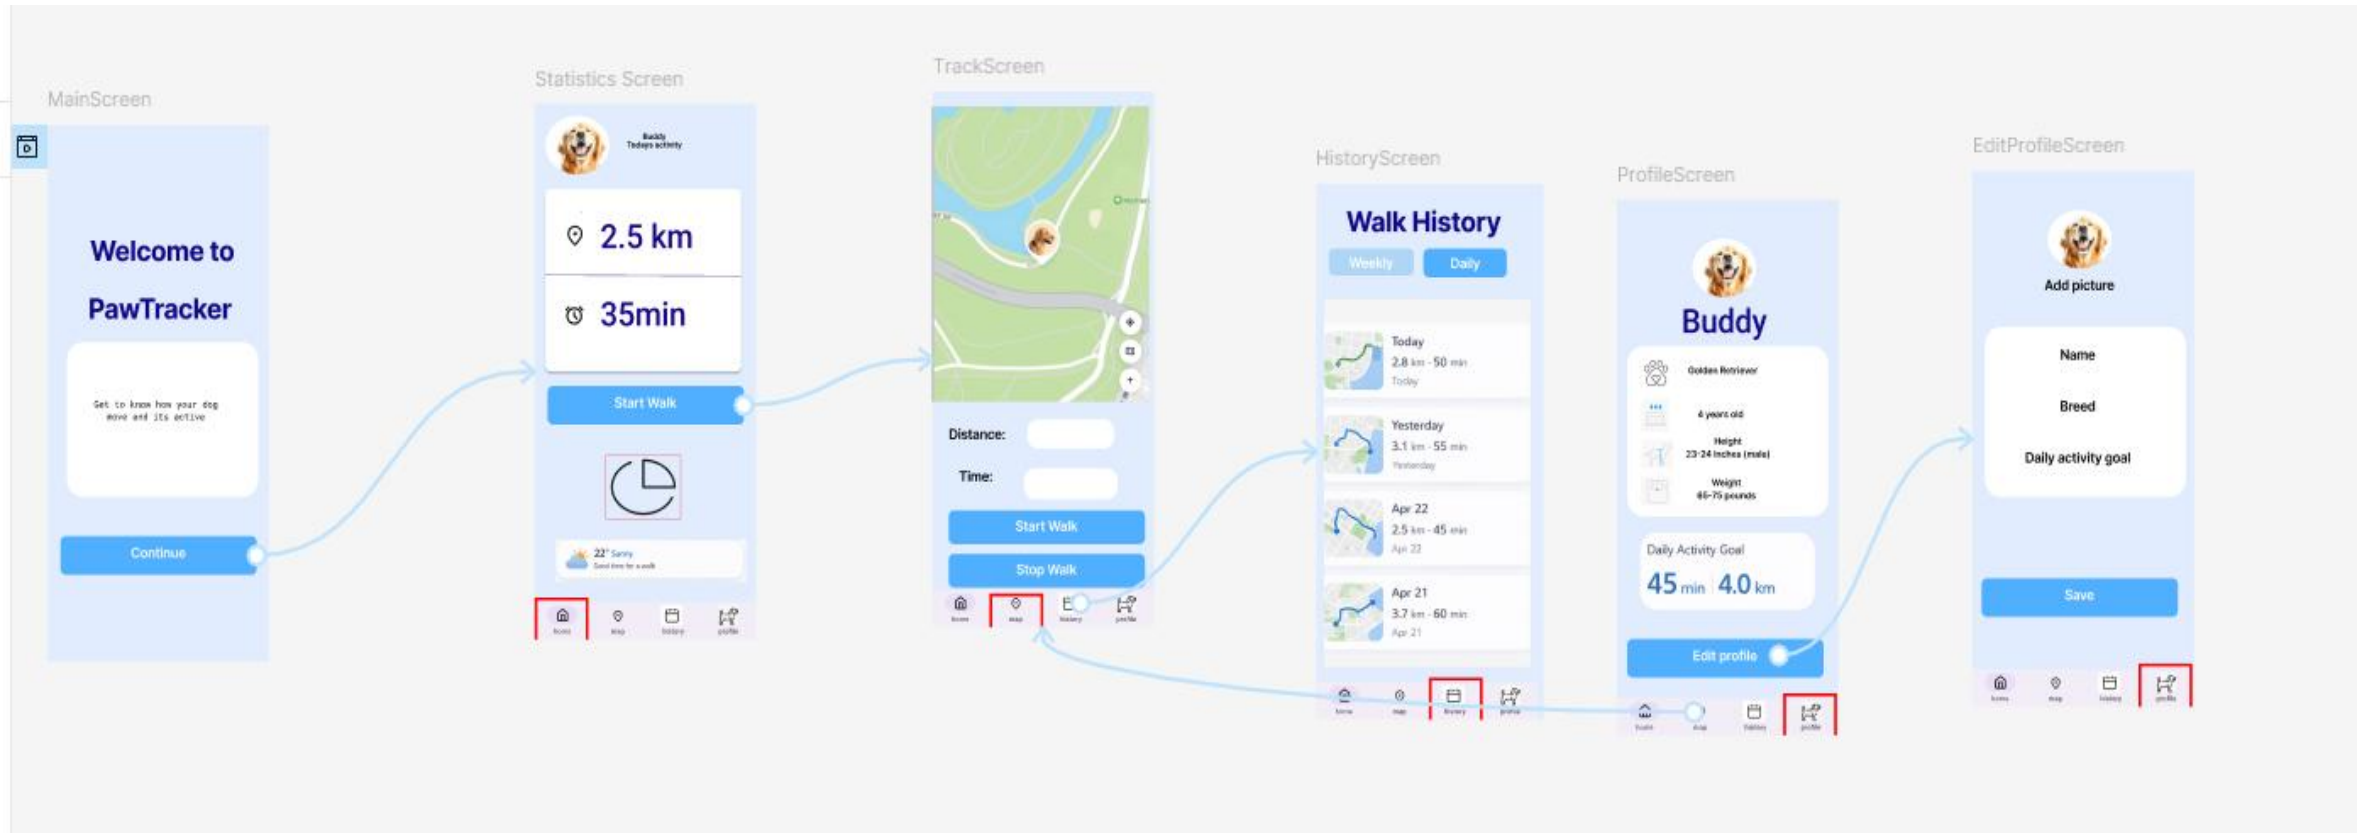

**Mobile Application
Development Project**

Emmi Korhonen

Farnaz Jamilpanah

Figma prototype:

Farnaz's tasks:

UI Tests

JUnit Tests

UI-test(TrackingScreenTest)

The screenshot shows the Android Studio interface during a test run. At the top, the code editor displays `innerPadding = PaddingValues()`. Below it, the 'Run' button is visible, and a tab for 'TrackingScreenTest' is active. The 'Status' bar indicates '7 passed' and '7 tests'. The 'Filter tests' section shows a green checkmark and a magnifying glass icon. The 'Tests' table lists the test results:

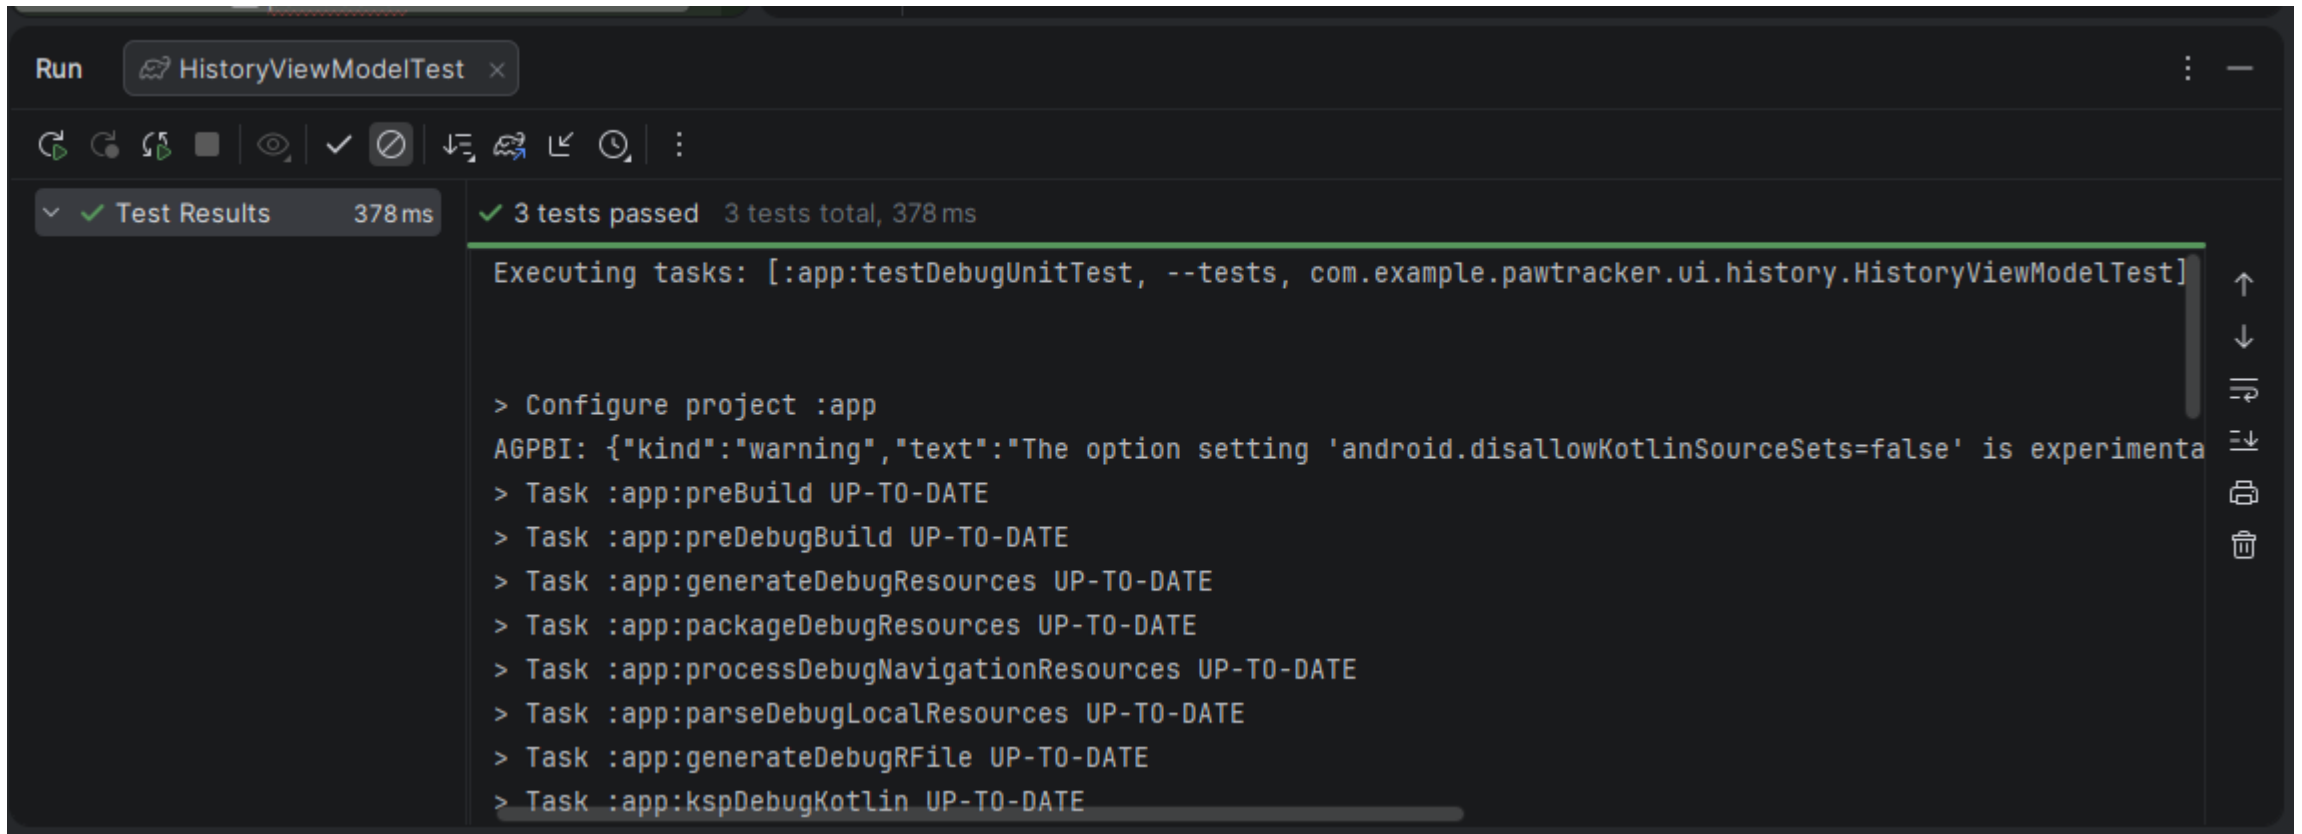

Tests	Duration	Medium_Phone
✓ Test Results	54 s	7/7
✓ TrackingScreenTest	54 s	7/7
✓ clicking_start_calls_onStart	17 s	✓
✓ stopButton_enabled_when_tracking	6 s	✓
✓ time_is_displayed_correctly_hours_and_minutes	4 s	✓
✓ clicking_stop_calls_onStop	7 s	✓
✓ distance_is_displayed_correctly	9 s	✓
✓ time_is_displayed_correctly_minutes_only	4 s	✓
✓ startButton_enabled_stopButton_disabled_initially	4 s	✓

On the right side, the 'Test Results' panel shows the following output:

```
> Task :app:createDebugAndroidTestApkListingFileRedirect
> Task :app:connectedDebugAndroidTest
Connected to process 6014 on device 'Medium_Phone [emulator-5554]'.

Starting 7 tests on Medium_Phone(AVD) - 14
Medium_Phone(AVD) - 14 Tests 0/7 completed. (0 skipped) (0 failed)
Medium_Phone(AVD) - 14 Tests 1/7 completed. (0 skipped) (0 failed)
Medium_Phone(AVD) - 14 Tests 3/7 completed. (0 skipped) (0 failed)
Medium_Phone(AVD) - 14 Tests 4/7 completed. (0 skipped) (0 failed)
Medium_Phone(AVD) - 14 Tests 6/7 completed. (0 skipped) (0 failed)
Medium_Phone(AVD) - 14 Tests 7/7 completed. (0 skipped) (0 failed)
Finished 7 tests on Medium_Phone(AVD) - 14
```

Junit-test(HistoryViewModelTest):

The screenshot shows the 'Run' window of an IDE. At the top, there's a tab labeled 'HistoryViewModelTest' with a close button. Below the tab is a toolbar with various icons for running and debugging. The main area displays the test results for 'HistoryViewModelTest'. It shows a green checkmark and the text '3 tests passed 3 tests total, 378 ms'. Below this, the output of the test is shown in a scrollable text area. The output starts with 'Executing tasks: [:app:testDebugUnitTest, --tests, com.example.pawtracker.ui.history.HistoryViewModelTest]'. It then lists several tasks that were executed, all of which are marked as 'UP-TO-DATE'. The tasks are: 'Configure project :app', 'Task :app:preBuild UP-TO-DATE', 'Task :app:preDebugBuild UP-TO-DATE', 'Task :app:generateDebugResources UP-TO-DATE', 'Task :app:packageDebugResources UP-TO-DATE', 'Task :app:processDebugNavigationResources UP-TO-DATE', 'Task :app:parseDebugLocalResources UP-TO-DATE', 'Task :app:generateDebugRFile UP-TO-DATE', and 'Task :app:kspDebugKotlin UP-TO-DATE'. On the right side of the output area, there are icons for scrolling and other actions.

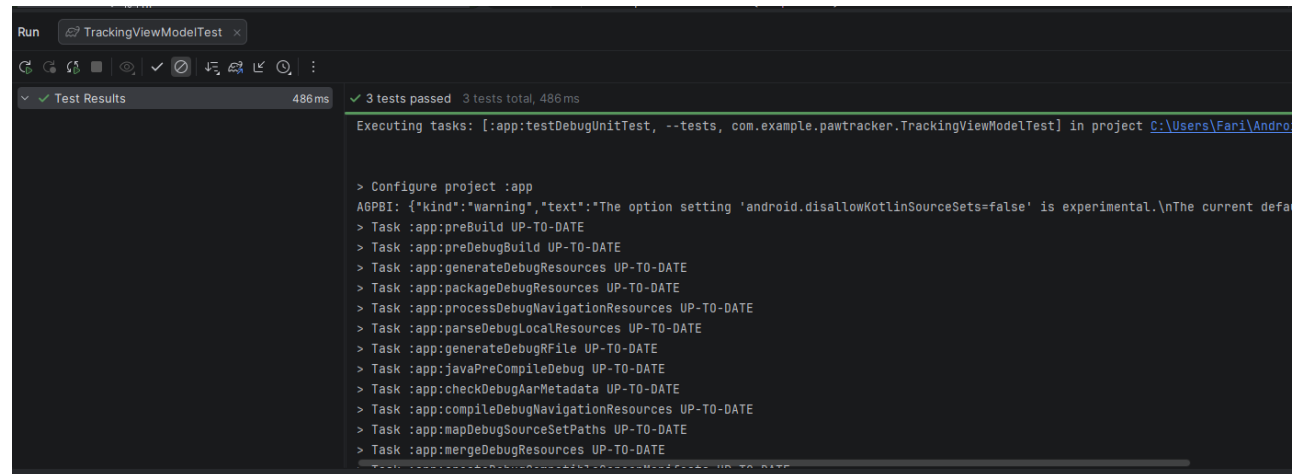

```
Run HistoryViewModelTest x
```

✓ 3 tests passed 3 tests total, 378 ms

Executing tasks: [:app:testDebugUnitTest, --tests, com.example.pawtracker.ui.history.HistoryViewModelTest]

> Configure project :app
AGPBI: {"kind":"warning","text":"The option setting 'android.disallowKotlinSourceSets=false' is experimental"}
> Task :app:preBuild UP-TO-DATE
> Task :app:preDebugBuild UP-TO-DATE
> Task :app:generateDebugResources UP-TO-DATE
> Task :app:packageDebugResources UP-TO-DATE
> Task :app:processDebugNavigationResources UP-TO-DATE
> Task :app:parseDebugLocalResources UP-TO-DATE
> Task :app:generateDebugRFile UP-TO-DATE
> Task :app:kspDebugKotlin UP-TO-DATE

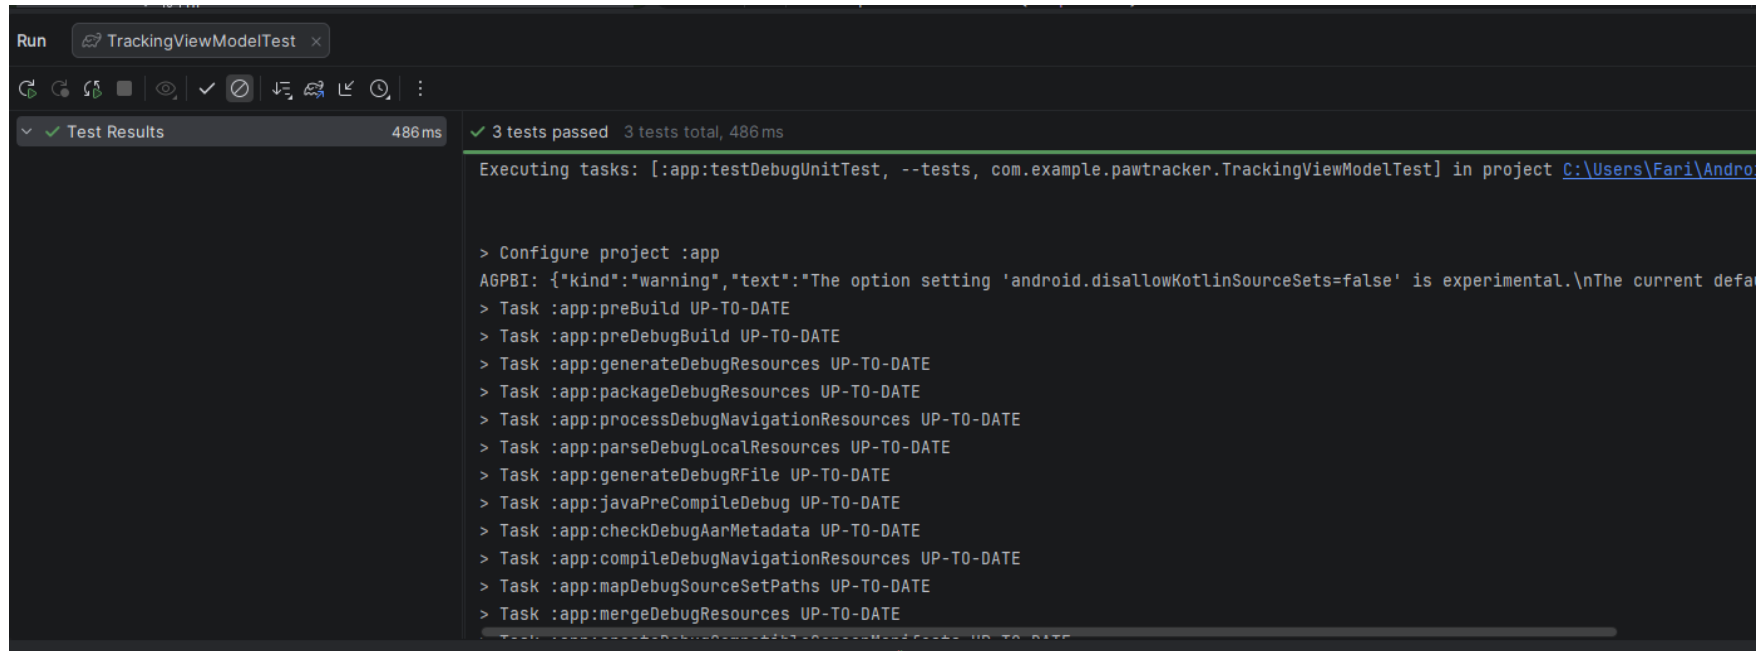

JUnit-test(TrackingViewModelTest):

```
Run TrackingViewModelTest x
Test Results 486ms 3 tests passed 3 tests total, 486ms
Executing tasks: [:app:testDebugUnitTest, --tests, com.example.pawtracker.TrackingViewModelTest] in project C:\Users\Fari\Andro

> Configure project :app
AGPBI: {"kind":"warning","text":"The option setting 'android.disallowKotlinSourceSets=false' is experimental.\nThe current default is 'true'. Please consider using the new default."}
> Task :app:preBuild UP-TO-DATE
> Task :app:preDebugBuild UP-TO-DATE
> Task :app:generateDebugResources UP-TO-DATE
> Task :app:packageDebugResources UP-TO-DATE
> Task :app:processDebugNavigationResources UP-TO-DATE
> Task :app:parseDebugLocalResources UP-TO-DATE
> Task :app:generateDebugRFile UP-TO-DATE
> Task :app:javaPreCompileDebug UP-TO-DATE
> Task :app:checkDebugAarMetadata UP-TO-DATE
> Task :app:compileDebugNavigationResources UP-TO-DATE
> Task :app:mapDebugSourceSetPaths UP-TO-DATE
> Task :app:mergeDebugResources UP-TO-DATE
```

Databasetest(WalkDaoTest):

The screenshot shows the 'Run' window in Android Studio. The top bar indicates 'Run' and 'TrackingViewModelTest'. Below the toolbar, the 'Test Results' tab is active, showing '3 tests passed' and '3 tests total, 486 ms'. The main area displays the execution tasks for the test, including configuration and build tasks, all of which are marked as 'UP-TO-DATE'.

```
Run TrackingViewModelTest x
✓ 3 tests passed 3 tests total, 486 ms
Executing tasks: [:app:testDebugUnitTest, --tests, com.example.pawtracker.TrackingViewModelTest] in project C:\Users\Fari\Andro

> Configure project :app
AGPBI: {"kind":"warning","text":"The option setting 'android.disallowKotlinSourceSets=false' is experimental.\n\nThe current defa
> Task :app:preBuild UP-TO-DATE
> Task :app:preDebugBuild UP-TO-DATE
> Task :app:generateDebugResources UP-TO-DATE

> Task :app:processDebugNavigationResources UP-TO-DATE
> Task :app:parseDebugLocalResources UP-TO-DATE
> Task :app:generateDebugRFile UP-TO-DATE
> Task :app:javaPreCompileDebug UP-TO-DATE
> Task :app:checkDebugAarMetadata UP-TO-DATE
> Task :app:compileDebugNavigationResources UP-TO-DATE
> Task :app:mapDebugSourceSetPaths UP-TO-DATE
> Task :app:mergeDebugResources UP-TO-DATE
```

Emmi's tasks:

- ProfileScreen
 - Implement button functionality, enabling users to navigate EditProfileScreen for updating profile information
- Main Screen
 - Implemented the button to continue from main screen
- Navigation
 - Show mainScreen to a new user and StatisticsScreen to previous user
- Fix errors
- Ui Improvements

meemmi commented [3 days ago](#) • edited ▾

Owner ...

This pr fix navigation and improves the app's architecture by moving the responsibility of data and logic initialization away from the UI layer.

Key Changes:

- **Clean UI Components:** Removed database and repository instantiation from all Composable screens. Screens now receive their ViewModels as parameters.
- **Centralized Injection:** Implemented a global ViewModelFactory to handle ViewModel creation within the NavGraph and MainActivity.
- **Resource Optimization:** Repositories are now initialized once in the PawTrackerApplication class, preventing redundant database connections
- **Lifecycle Awareness:** Upgraded state collection from collectAsState to collectAsStateWithLifecycle to optimize battery usage and resource management when the app is in the background.
- **Navigation:** Created DataStore for onboarding. Navigation shows MainScreen for a new user and StatisticsScreen for previous user
- **Layout:** Implemented WindowInsets and edge to edge prevent navigation bar overlap
- Added implementation for storing **ProfileInfoCard** data to Room and update it on screens

Challenges:

- At the beginning of the sprint, we discovered that some of the files in the main branch had been overwritten with older versions, causing loss of previously implemented features
- Previous day application architecture changes impacted testing:
 - Existing tests were built based on the previous architecture

Sprint 5 goals:

- Technical Fixes & UI Polishing
- Final Presentation
- Update GitHub

Thank you!

We appreciate feedback
